

NAPA TRACS GROWS WITH YOU

Have big dreams of the future of your business? Want to expand, either to a larger shop or more **shops**? Let NAPA TRACS grow with you! Not only will NAPA TRACS help increase and maximize profits, TRACS adapts to your growth.

When your business grows, whether you move to a larger location or add another shop to your **franchise**, NAPA TRACS lets you keep your current information (customer history, billing information, etc.) and seamlessly adds the new.

If a client moves closer to a different shop than the one they currently use, their information is still available when needed. You can expand into a larger shop without losing your customer information. If you add more inventory or services to your repertoire, NAPA TRACS will accommodate the expansion and help your shop adjust prices accordingly.

Don't believe us? Let actual NAPA TRACS users tell you themselves how TRACS helped them grow:

"Back in the late '80s, we weren't doing the heavy business volume that we're running today...(now) we've moved strongly into commercial fleets, motor homes and detailing...There's just no way we could physically operate this business at the pace we're doing today—as profitably as we are—without TRACS."

"Our TRACS system...makes it possible for me to profitably manage 18 techs and a 16,000 square foot facility hour by hour, dollar for dollar."

-Billy Duffy, Duffy's Repair Center

"NAPA...has been a key reason for our success—we've added a third location this year. I'm interested in anything that makes me more money in less time—and I couldn't run these three shops successfully without the powerful online tools that NAPA TRACS provides."

-Tyler Ellenson, Ellenson Automotive

Both of these shops started small, but with the help of NAPA TRACS they were able to expand. They still use NAPA TRACS, because TRACS is designed to work with shops of all sizes, from a single lift garage to multiple locations, to a shop with 16 lifts.

NAPA TRACS has over two decades of experience and is still going strong.
